

KneeSchool.com Master Development Playbook

Vision

KneeSchool is intended to become the world's leading educational platform dedicated to knee health, anatomy, biomechanics, imaging, pathology, surgery, rehabilitation and research. It serves patients, medical students, MRCS trainees, FRCS candidates, fellows and consultants. The platform acts as a knee encyclopaedia while supporting Sportshealing clinical services and OmKneeHealth products.

Educational Levels

Patient Academy; Medical Student Academy; MRCS Academy; FRCS (Tr & Orth) Academy; Fellowship Academy; Consultant Masterclass.

Core Site Structure

Learn by Level; Knee Encyclopaedia; Anatomy; Biomechanics; Clinical Examination; Imaging; Conditions; Surgery Academy; Rehabilitation Academy; Women's Knee Health; Children's Knee Health; Performance & Prevention; Research Academy; Case Library; Question Bank; Video Library; Knee Score Centre; Products & Services; Community; About.

Homepage Concept

Large search-first experience, learning pathways, interactive knee model, featured learning modules, topic exploration cards, progress tracking and AI-assisted search.

Design Aesthetic

University-grade authority combined with modern educational design. Deep green, ivory, gold accents and scientific visual identity. Mobile-first architecture. Interactive anatomy, imaging sliders, quizzes and learning pathways.

Development Timeline

Phase 1 Foundation (Months 1-3); Phase 2 Educational Build (Months 4-9); Phase 3 Advanced Content and Monetisation (Months 10-18). Create structure first, then core anatomy, biomechanics, examination, conditions, surgery, research and multimedia libraries.

Content Production Targets

Month 3: 100 articles. Month 6: 250 articles. Month 12: 600 articles. Month 18: 1000+ articles.

Knowledge Sources

Textbooks: Scott Surgery of the Knee, Insall & Scott, DeLee & Drez, Campbell, Miller, Netter, Gray's Anatomy, AAOS Basic Science, Nordin & Frankel. Societies: BASK, ESSKA, ISAKOS, AAOS, AOSSM. Databases: PubMed, Cochrane, Google Scholar. Imaging resources: Radiopaedia and institutional teaching files. Internal assets: publications, lectures, presentations, surgical notes, videos and research.

Repository Structure

Create topic folders for ACL, PCL, MCL, PLC, Meniscus, Cartilage, Patellofemoral, Osteotomy, Arthroplasty, Paediatric Knee, Rehabilitation, Women's Knee Health, Imaging and Research. Each

folder contains textbooks, landmark papers, guidelines, presentations, videos, images and draft articles.

Assistant Workflow

1. Learn site map and educational levels. 2. Gather source material. 3. Organise repository. 4. Upload topic-specific sources to AI. 5. Create content brief. 6. Generate article with AI. 7. Editorial review. 8. Fact verification. 9. Consultant review. 10. SEO optimisation. 11. Publish.

AI Prompt Framework

Generate content for Patient, Medical Student, MRCS, FRCS and Fellowship levels. Include anatomy, biomechanics, pathology, imaging, treatment, rehabilitation, controversies, references, FAQs and key learning points. Use UK English and evidence-based language.

Quality Control

Tier 1 AI generation. Tier 2 assistant editorial review. Tier 3 evidence verification. Tier 4 consultant review. Tier 5 publication. No fabricated references. All factual claims checked against source material.

Weekly Operating Schedule

Monday: gather and organise sources. Tuesday: create briefs and AI drafts. Wednesday: editorial review and fact checking. Thursday: prepare review packs. Friday: consultant review and publication.

Commercial Integration

Educational content remains primary. Sportshealing consultations, imaging, injections, surgery and rehabilitation are linked contextually. OmKneeHealth supplements, braces and recovery products are suggested only where relevant.

Long-Term Vision

Develop the definitive global knee education ecosystem including encyclopaedia, learning academy, AI tutor, case library, examination preparation, consultant masterclasses, video academy, research hub and clinical referral pathways.

Detailed Sitemap Summary

Patient Academy; Medical Student Academy; MRCS Academy; FRCS Academy; Fellowship Academy. Encyclopaedia sections include Anatomy, Biomechanics, Clinical Examination, Imaging, Conditions, Surgery, Rehabilitation, Women's Health, Paediatric Knee, Research, Cases, Question Bank and Videos. Conditions include ACL, PCL, MCL, PLC, Meniscus, Cartilage, Patellofemoral disorders, Osteoarthritis, Inflammatory disease, Tumours and Infection.
